

Augmentative and Alternative Communication

Short Courses for Speech and Language Therapists

Presented by the Central Remedial Clinic and the Department of Clinical Speech and Language Studies

Assessment in AAC

28th November 2016

System Selection

29th November 2016

Intervention in AAC

20th January 2017

Day One:

Assessment in AAC

This one day course focuses on assessment in AAC providing participants with the ability to critically evaluate the communication competencies of potential AAC users, identify key factors which will inform intervention planning as well as develop an ability to apply system feature-to-person matching to facilitate communication.

Course fees:

Day One: €140

Day Two: €140

Day Three: €140

Full Series (3 full days): € 350

Day Two:

System Selection

The second course focuses on identifying what AAC system is the best fit for your client's needs. This session will provide participants with the ability to critically evaluate a range of different communication systems and identify multimodal communication solutions for a range of different clinical presentations. This course will include a number of experiential workshop sessions to give participants hands-on experience with a range of AAC systems.

Day Three:

Intervention in AAC

The final course provides a framework for AAC therapy. This course aims to provide participants with the ability to plan and rationalize an intervention plan while also evaluating intervention effects and applying problem solving to address challenges.

These courses provide up-to-date information on working with clients who may need AAC.

They are designed to suit participants who are relatively new to work in this area or those who wish to update their skills combining experiential learning and workshop activities.

~~~

Each course may be taken as a stand-alone course however discounts are available for therapists attending the full series.

~~~
